

AES offers:

- Panelized Wall Systems
- Cold-Formed Steel Trusses
- MCM Panel Systems
- Architectural Cladding Systems
- Rain-Screen Wall Systems

Advanced Exterior Systems (AES) is your source for Metal Wall Panels, Cold-Formed Steel Trusses, and Panelized Wall Systems. Serving the commercial and industrial building industry in the Southeast since 1977, AES designs, engineers and fabricates in our 70,000-squarefoot facility. Our passion is building strong customer relationships and being the partner that helps drive your job.

MISSION STATEMENT:

Every member of our team is committed to long term relationships with our clients, based on safety, meeting expectations and quality. Our commitment to this mission provides an environment that encourages new ideas, focused teams, and continuous improvement.

Advanced Exterior Systems is one of the Southeast's largest metal truss manufacturers. The possibilities are endless with the design flexibility of our systems.

COLD-FORMED STEEL TRUSSES

Advanced Exterior Systems is one of the Southeast's largest metal truss manufacturers. We offer over 30 years experience in the construction industry. Two systems are available including the conventional "C" stud truss as well as the most widely used prefabricated truss product, AEGIS Ultra-Span®.

Our comprehensive experience and services include:

- All products available for Installation by AES work forces
- Turn-key services including design, engineering, fabrication and installation
- Average EMR of .65 of last (4) years
- \$100 million bonding capacity

Contact Advanced Exterior Systems today, consult with one of our design professionals to determine your perfect roofline and take advantage of AES's unmatched service and quality.

ADVANTAGES OF COLD-FORMED STEEL TRUSSES

- 100% Prime Steel
- High Recyclable Content with available LEED Credits
- 100% Non-Combustible Materials
- Insect Resistant
- Moisture and Mold Resistant
- Resistant against material deterioration and shrinkage

Additional Capabilities and Services Include:

- Fabrication in a controlled environment for exceptional quality control
- Specialized Products such as Dormers, Cupola's, and Chimney's
- Metal Decking, Plywood, and other Accessory Items
- Trusses are Fabricated on a Gantry Table for Consistent Quality
- BIM Modeling available
- Award Winning and Documented Safety Program with Full Time Safety Coordinator
- Free Roof Truss Design Consultation
- Wide Range of Engineering Services Available
