Advanced Exterior Systems (AES) is your source for Metal Wall Panels, Light Gauge Steel Trusses, and Panelized Wall Systems. Serving the commercial and industrial building industry in the Southeast since 1977, AES designs, engineers and fabricates in our 70,000-square foot facility.

MISSION STATEMENT:
Every member of our team is committed to long term relationships with our clients, based on safety, meeting expectations and quality. Our commitment to this mission provides an environment that encourages new ideas, focused teams, and continuous improvement.

When needed by the client, we move beyond the Metal Composite Systems into a myriad of other claddings for many designs.

EXTERIOR ARCHITECTURAL CLADDING SYSTEMS

Our quality products include:

- Foam Insulated Panels
- Single-Ply Profile Metal Panel Systems
- Shimmer Walls
- Parking Deck Screens
- Equipment Screens
- Green Screens
- Specialized Soffit Systems
- Mechanical and Decorative Louvers
- Flashings and associated accessories
- Insulated and non-insulated aluminium composite panel systems
- Metal Column Covers
- Louver Screen Systems
- Perforated Panel Systems
- Custom Brake Metal and Flashing
- Sunshades
- Terra- Cotta Rain Screens

ADVANTAGES OF EXTERIOR ARCHITECTURAL CLADDING SYSTEMS

- Weather tight time frames
- Long-life coatings are available in a variety of glosses, colors and textures
- Filter out the sun's heat and glare
- Lightweight and great strength to weight ratios
- For use on LEED projects

Whether serving a utilitarian, design or a combination purpose, the single product use or the intermixing of any of these systems can add a unique exterior design to your structure. Each product and installation is backed up by years of experience in the marketplace and the personnel whose goal is to always have a satisfied customer.
